

ABSTRACT

[0036] Embodiments of a filter assembly and method of fabricating the same are provided. In one embodiment, a filter assembly includes a filter media pack disposed in a frame assembly. A first seal biases the filter media pack against a second seal along at least one edge of the media pack. In another aspect, a method of fabricating a filter assembly includes the steps of placing a filter media pack in at least a first portion of a frame assembly and compressing an edge of the media pack between a first and second seal.
